## List of airliners by maximum takeoff weight - Wikipedia

That's 17,248 times the amount of fuel held in the gas tank of a Dodge Ram pickup truck. However, not all of that fuel is being used during a single flight—in fact, the plane only uses an average of five gallons of fuel per mile, meaning a 3,450-mile trip from New York to London only requires about a third of the plane's total fuel capacity.

## 45 Amazing Airplane Facts | Best Life

If you've ever watched a jet plane taking off or coming in to land, the first thing you'll have noticed is the noise of the engines. Jet engines, which are long metal tubes burning a continuous rush of fuel and air, are far noisier (and far more powerful) than traditional propeller engines.
